

SOFÍA ARZAMENDIA

FULLSTACK SOFTWARE DEVELOPER

WORK EXPERIENCE:

FULLSTACK SOFTWARE CONSULTANT

Solvo | 07/2023 - 04/2024

- Worked migrating Sharepoint applications to React 17 for a USA company that produce fuel and energy.
- Used tailwind, React, Azure Devops, .Net Core and Postman.
- Created new apis with .Net Core. Data base first approach, using entity framework and Sql.

SOFTWARE CONSULTANT

Kin + Carta | 06/2022 - 07/2023

- Created documentation of new Rest APIS.
- Developed Rest APIS written in C# using .Net Core 5 framework.
- Developed a feature to save documents in Azure Blob Storage.
- Worked with Azure Service Bus queues, topics, and subscriptions.
- Delivered 6+ Azure Functions.
- Created and designed the unit test for every API and azure function I worked on.
- Troubleshooted code related-issues and defects.
- Worked with the Scrum framework as agile methodology. I demoed every 2 weeks the new features I worked on to the client.

FULLSTACK DEVELOPER

Santander Tecnología | 01/2020 - 06/2022

- Assisted with the development of two projects from end to end: a management system for employment contracts (project CODIG) and a system for management of payment to suppliers (project PAP).
- Developed more than 15 Rest APIS using .Net Core 3.1.
- Utilized Reactjs, Material-UI, axios, css for the frontend development.
- Tested the frontend to achieve the 80% of code coverage using react testing-library and jest.
- Tested the backend using Xunit (.Net testing library).
- Used SQL Server (for project PAP) and MongoDB (for project CODIG) as databases.
- Used Openshift as container management system and Gitlab for continuous integration and deployment.

APPLICATION DEVELOPMENT ANALYST

Accenture | 2018-2020

- Assisted with the development of 2 projects for Galicia home banking : the new investment site and project COMEX (for international money transfers).
- Utilized .Net framework 4.5 for online banking web and .Net Core for microservices.
- Used Bootstrap, JQuery, AJAX, HTML5, CSS, and Razor for frontend development.
- Worked with Soap and Rest services.
- Troubleshooting.
- Tested office banking (online banking for companies) to achieve the 60% of code coverage. I used Intellitest to achieve this goal.
- Used TFS for git source code management
- SQL Server as database
